Section Note 3 states:

3. Throughout this Schedule, the expression "base metals" means : iron and steel, copper, nickel, aluminium, lead, zinc, tin, tungsten (wolfram), molybdenum, tantalum, magnesium, cobalt, bismuth, cadmium, titanium, zirconium, antimony, manganese, beryllium, chromium, germanium, vanadium, gallium, hafnium, indium, niobium (columbium), rhenium and thallium.

The chapter notes for chapter 82 are as follows:

1. Apart from blow lamps, portable forges, grinding wheels with frameworks, manicure or pedicure sets, and goods of heading No.82.09, this chapter covers only articles with a blade, working edge, working surface or other working part of:

Explanatory Notes to Chapter 82 states

"Tools, cutlery etc do not in general fall in this Chapter unless the blade, working edge, working surface or other working part is of base metal, of metal carbides or of cermets".

A combined reading of Section and Chapter notes and description of goods covered under Tariff heading 8201 reveals that the goods covered under this Section XV have to be made of base metals or should be articles of base metals. **Base metals**

as per Section Note above do not include plastics'. Further, chapter 82 covering '*Tools, implements, cutlery, spoons and forks, of base metal; parts thereof of base metal*' should necessarily have a *blade, working edge, working surface or other working part of base metal or others as above.*

Paddy seedlings are grown in these trays after suitable soil is placed in them. The holes are designed to ensure optimum drainage of water and to prevent the roots from getting damaged. Once the seedlings are grown as a single mat, the trays used to transport the seedlings to the land for transplantation. This may be done directly by the farmer or the seedling mats may be placed in rice transplant machinery which will carry on the transplantation work. The Applicant states that the trays are mostly sold to farmers. These trays can also be used as an accessory to paddy transplantation machinery in terms of the dimension of the seedlings mat grown, spacing between each seedling etc. The trays help in growing and transporting the seedlings in an organized, labour-saving manner so that the seedling mats grown can be fed into the machines or planted as such by hand. However, the tray itself is not a part of any machine or used with any machine or electronically driven nor is it an accessory of any agricultural machinery. Rice planting machinery do not need these seedling trays to function and hence cannot be classified as parts or accessories of agricultural machinery.
